EDUCATION

- **Columbia University** New York, NY
Master of Statistics, GPA: 3.76 *Sep. 2021 – Dec. 2022*
- **University of California, Berkeley** Berkeley, CA
Exchange Student in Data Science, GPA: 3.5 *Aug. 2018 – Dec. 2018*
Courses: CS100, Stat 140
- **Central China Normal University** Wuhan, China
Bachelor of Computer Science, GPA: 86.7/100 *Sep. 2016 – Jun. 2020*
Courses: Data Structures, Algorithms, Databases

EXPERIENCE

- **Meta** Los Angeles, CA
Data Engineer *Nov 2023 – Present*
 - **Ray-Ban Meta Smart Glasses Sales Data Pipeline:** Built automated data pipelines and dashboards for Ray-Ban Meta smart glasses sales. These reports help sales and product managers track sales performance, monitor revenue trends, and make business decisions.
 - **Third-Party Customer Feedback Data Infrastructure:** Built data infrastructure with multiple pipelines that collect customer feedback from third-party sources, including Reddit discussions and Amazon product reviews. When a third-party provider discontinued its service, led an urgent rebuild that restored full data coverage and cut annual costs from approximately \$200,000 to under \$4,000. Four other Meta teams later adopted the solution.
 - **Customer Feedback Analytics Platform:** Built a searchable database and dashboard using Python, Spark, and React to organize feedback from bug reports, support tickets, and public discussions. It helps product and sales teams identify common complaints and prioritize improvements. Expanded the platform to eight additional product teams, increasing usage 26 times in six months.
- **Knowtix** San Francisco, CA
Founding Software Engineer *Jan 2023 – Nov 2023*
 - **Medical Notes Software:** Built the core software that converts recorded doctor-patient conversations into organized medical notes for doctors to review and edit. Designed services for processing recordings, storing each doctor's note history, and connecting the mobile application with the database.
 - **Mobile Application:** Built and launched an iPhone and Android application that lets doctors record patient visits and review notes on the go. Led the product from initial concept through its public launch on the Apple App Store: [Knowtix on App Store](#).
 - **Medical Data Storage System:** Designed a secure system for storing and retrieving medical transcripts, including patient privacy protections, version history, and access controls.
- **Meta** New York, NY
Data Engineer Intern *May 2022 – Aug 2022*
 - **Seller Retention Reporting:** Built data systems and a dashboard that track how effectively Facebook Marketplace retains active sellers. Product managers used the findings to plan strategies for growing the seller community.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java, JavaScript, Go, Hack
- **Data Processing Tools:** Dataswarm, Presto, Spark, Hive, Airflow
- **Cloud & Infrastructure:** Amazon Web Services (AWS), Docker, Kubernetes
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, ElasticSearch, Neo4j, Tao
- **Web & Mobile Development:** React, React Native, Streamlit, FastAPI
