SUMMARY

AI Engineer with 3+ years of production experience building and deploying LLM-powered systems end-to-end at Meta and as a founding engineer at an AI healthcare startup. Deep expertise in agentic AI (Claude Agent SDK), RAG pipelines, and LLM fine-tuning.

EXPERIENCE

- Meta** Los Angeles, CA
Data Engineer Nov 2023 – Present
 - MyRA – Agentic Reporting Platform:** Built **MyRA**, an agentic reporting platform on Claude Code (Claude Agent SDK) that cut recurring analyst reporting time by **approximately 60%** for 40+ analysts and execs across Reality Labs, powering 20+ automated reports (Ray-Ban Meta, Oakley, Quest, Horizon).
 - Agent Harness & Reporting-Native UI:** Designed the agent harness: curated data-source instruction files scope each query to the right tables for correct SQL; agentic evals plus a **self-reflection pass** (the agent reviews the full session for instruction drift) keep long sessions reliable. Shipped a reporting-native UI — live report preview, version-to-version diffs, and an inline source-map panel tracing each sentence to its data.
 - LLM-based Product Social Listening Tool:** Built a conversational LLM product aggregating bug reports, tickets, and public posts for Ray-Ban and Quest insights. **Featured in Meta's engineering blog: [Harnessing the Power of Customer Feedback](#)**. Powered real-time sentiment tracking during Meta Connect 2024; **3K MAU**, **10+ orgs** adopted.
- Knowtex** San Francisco, CA
Founding Software Engineer Jan 2023 – Nov 2023
 - AI-Powered SOAP Note System:** Architected a **RAG pipeline** generating structured SOAP medical notes from doctor-patient conversations, personalizing output via each physician's historical notes to match their style — deployed in live clinical environments.
 - Customized LLM Model:** Fine-tuned **Llama 2** on production medical transcription data, improving SOAP note quality by **20%**; owned data curation, training, and evaluation end to end.
 - Cross-Platform Mobile App:** Shipped a cross-platform **React Native + TypeScript** app for recording patient visits and reviewing AI-generated notes — zero to App Store launch: [Knowtex on App Store](#).
- Meta** New York, NY
Data Engineer Intern May 2022 – Aug 2022
 - Seller Retention Dashboard:** Built an end-to-end data pipeline and dashboard tracking Facebook Marketplace seller retention, informing PM growth strategy.

SKILLS

- Languages:** Python, Hack, SQL, Go, Java, JavaScript
- AI/ML:** Claude Agent SDK, agentic evals & guardrails, PyTorch, TensorFlow, RAG, LLaMA, HuggingFace, LangChain
- Data Engineering:** Dataswarm, Presto, Spark, Hive, AWS, Docker, Kubernetes
- Databases:** PostgreSQL, Tao, MySQL, DynamoDB, MongoDB, Elasticsearch, Neo4j
- Web & Visualization:** React, React Native, Streamlit

EDUCATION

- Columbia University** New York, NY
Master of Statistics, GPA: 3.76 Sep. 2021 – Dec. 2022
- University of California, Berkeley** Berkeley, CA
Exchange Student in Data Science, GPA: 3.5 Aug. 2018 – Dec. 2018
- Central China Normal University** Wuhan, China
Bachelor of Computer Science, GPA: 86.7/100 Sep. 2016 – Jun. 2020
